Objective

Coffee, coding, and problem-solving are my passions. I love using Golang for its simplicity and ease in building large systems.

Work experience

DOIT SOLUTIONS   6/2023 - Persent

Backend developer

I contributed to **system designing** a production optimization system for a biology lab. My contributions included project structuring, implementing **Domain-Driven Design (DDD),**
deploying **Redis** for caching, scheduling tasks, and background tasks,
and implementing an error notification and real-time error tracking service.
Collaborating with frontend developers (**Vuejs**).

DOIT SOLUTIONS   3/2024 - 6/2023

Internship

Contributed to the design and implementation of warehouse management features for an agricultural enterprise.
Developed frontend functionalities using **Vue.js**.
Built R**ESTful APIs** for the backend using **Gin**.
Designed and optimized database queries using **Gorm** and **MySQL**.
Wrote unit tests and developed supporting command-line tools.

Honors & Awards

Won third place in the Lâm Đồng startup competition (https://baolamdong.vn/ban-tre/202312/hieu-ich-phan-mem-quan-ly-phong-nuoi-cay-mo-seedify-bi-olab-e09296a/)
